

Plan for protection and management of international students for the first semester of 2021

- All international students entering Korea need to take three COVID-19(PCR) tests before being released from quarantine
 - International students must **submit a negative COVID-19(PCR) test result issued within 72 hours*** prior to departure from their home country. Those without a negative PCR test result will be **denied to enter Korea**

* Depart at 10:00 on January 10, 2021, the document only issued after 12am on January 7, 2021 will be accepted.

- COVID-19(PCR) test is conducted at the clinic* having jurisdiction over the self-quarantine place **within a day** after entry, and **additional test will be conducted before being released from 14-day self-quarantine**

* If symptoms are detected during airport quarantine, PCR test will be conducted at the airport

- Those who leave the quarantine area without permission or fail to comply with quarantine guidelines, will be required to wear a tracking safety wrist band, or be quarantined in a separated quarantine facility(at your own expense), and can face a penalty or will be deported.
- If a self-quarantine violator is infected with COVID-19, the violator will pay the full amount of quarantine hospitalization treatment cost.
- ※ **Establish an immigration management plan** for international students by university and **share immigration information with local governments** (international students enter the country within quarantine management conditions)
