

About the OECD World Forums on Statistics, Knowledge and Policy

The OECD World Forums on Statistics, Knowledge and Policy were launched well over a decade ago to bring more attention to the need for better measures and policies for well-being and progress.

Held every 2-3 years since 2004, the Forums have brought together thousands of leaders, experts and practitioners from all sectors of society and have contributed to an ongoing paradigm shift that emphasises people's well-being and inclusive growth as the ultimate focus for policies and collective action.

Speakers

As on previous occasions, the Forum will bring together inspiring speakers including world leaders, Nobel-Prize winners, and innovators and change-makers from government, statistics, research, business and civil society.

Confirmed speakers for the 6th OECD World Forum include: Nobel Prize winner Joseph E. Stiglitz as well as OECD Secretary-General Angel Gurría, Commissioner of Statistics Korea, Kang Shin-Wook, former UN Secretary-General Ban Ki-moon and UN Executive Secretary for the Economic Commission for Latin America and the Caribbean, Alicia Bárcena.

Overview

Dates	27-29 November 2018
Venue	Songdo ConvensiA, Incheon, Korea
Hosts	OECD and Statistics Korea
Theme	The Future of Well-being
Official Language	English
Participants	About 1,500 participants from 100 countries - leaders, experts and practitioners from all sectors of society

How to attend

Attendance is by invitation only, but you can request an invitation by sending a CV and a short explanation of your interest to wellbeing@oecd.org. The official website for the Forum is www.oecd-6wf.go.kr

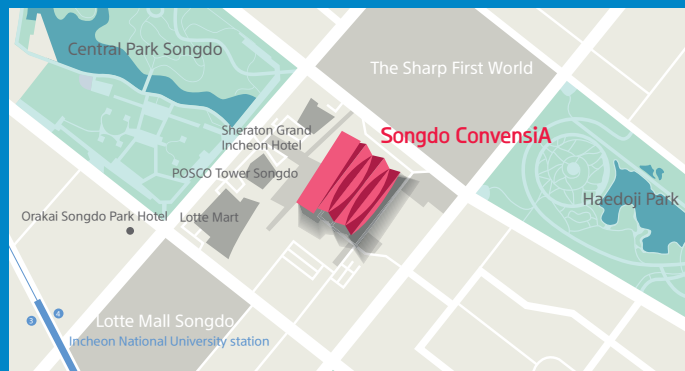

In addition to the main Forum, there will be an Exhibition where organisations with projects relevant to the Forum themes can display their work and make short presentations.
For more information, please also email wellbeing@oecd.org

For all other questions related to the Forum,
please email wellbeing@oecd.org or oecd2018@korea.kr

The Forum is free of charge (no conference fee),
but participants will be responsible for their own travel expenses.

transfer to bus (8, 6, 6-1, 780)
Come out of Exit 4 of Incheon National University Station
on the Incheon Subway Line (Approx. 10 minutes on foot)

The 6th OECD World Forum

on Statistics, Knowledge and Policy

THE FUTURE OF WELL-BEING

27-29 NOVEMBER 2018
SONGDO CONVENSI A,
INCHEON, KOREA

The Future of Well-being

The aim of this 6th OECD World Forum is to look ahead to the Future of Well-being, and to ask what are the trends that will re-shape people's lives in the decades to come?

The world we live in today is more connected, and yet more fragmented than ever. Ensuring inclusive growth and well-being in this new landscape will require policy makers and actors from across society to think and act creatively, anticipating new risks and opportunities, and opening up to new approaches and new forms of partnership and collaboration across sectors.

The Forum will take a broad perspective to addressing the future of well-being, but will put a particular emphasis on three important trends - the digital transformation, the changing role of governance, and the emergence of the private sector as an important actor for ensuring sustainable and inclusive well-being - as well as looking at the interplay of these three factors.

As always, the Forum will showcase innovations and experiences from pioneers in well-being measurement and policy from around the world, but will explore the issues from a much more forward-looking perspective. By taking a wide-ranging approach to consider how life will be in tomorrow's world, it will aim to map a plan of action for people, government and businesses today.

Key Themes of the 6th OECD World Forum

Digitalisation and well-being

Technologies, smart applications and other innovations in the digital economy will improve people's life experiences and help address statistical and policy challenges in a wide range of areas including health, public governance, tax, transport, education, and the environment. However, digital technologies will also be disruptive, with far-reaching effects on inequalities, employment and well-being. These sessions will discuss the opportunities and challenges presented by the "digital transformation".

Governance in a complex world

These sessions will address the new modes of governance that are needed to ensure inclusive growth and sustainable well-being in the coming years. They will address issues such as the need for an 'empowering state' that invests in fostering equality and improving people's lives, how governments can and should work together with non-state actors from the private sector and civil society, how to ensure international cooperation into the future, how to make the connection between local action and global realities, and how to rebuild trust amongst citizens.

Business and well-being

Achieving sustainable and inclusive well-being in the coming years will mean leveraging the important role of non-state actors, and particularly the private sector, in shaping good outcomes for individuals, communities and societies. These sessions will discuss how a well-being and inclusive growth approach can be fully integrated into business models and measurement frameworks, giving voice to business leaders who are setting a new course to foster more sustainable and people-minded strategies.

Programme at a glance
